

KILO' - Active Cream

Natural Treatments: New KILO' treatment (product code S1-K100)

DESCRIPTION

Active cream rich in natural active agents which carry out an effective action on the tissues, moisturizing, protecting and stimulating the skin. This product, working synergistically with the other professional products of the kit, favours the efficacy of Kilò treatment.

It is available in tube of 200 ml inside the professional kit.

MAIN ACTIVE AGENTS

Rice Bran oil (*Oryza Sativa*) - It is a very potent skin protectant with antioxidant properties.

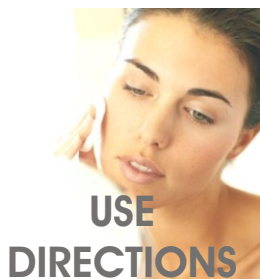

Sunflower seed oil (*Helianthus Annus*) - It helps to moisturize, regenerate and condition the skin.

Caffeine - Caffeine presents a lipolytic effect. It also improves blood circulation.

Butcher's Broom extract (*Ruscus Aculeatus*) - It acts mainly on the microcirculation, decreasing capillary permeability due to its content of a flavonoid called Rutin. It helps to increase circulation, reduces edema, reduces swelling and act as an anti-inflammatory.

Cola Acuminata Seed Extract - It increase blood circulation, and has firming and slimming effects on the skin.

Thai Chili Peper Extract (*Capiscum Frutescens*) - Detoxifying and stimulating properties.

Professional use.

NOTES

KILO' - Modelling Fluid

Natural Treatments: New KILO' treatment (product code S1-CK101)

DESCRIPTION

Specific active body fluid for firming and moisturizing tissues. Enriched with natural active ingredients as clover extract and soy protein, it has regenerative effect on the tissue, supporting the modelling action of the treatment.

Available in tube of 200 ml - inside Cellend kit.

MAIN ACTIVE AGENTS

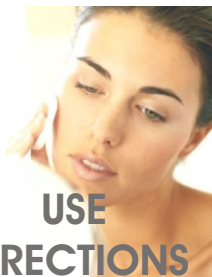

Clover Flower Extract (Trifolium Pratense) - Clover's natural properties are beneficial in the treatment of skin inflammations. It also contains isoflavones and has moisturizing properties.

Soybean Protein (Glycine Soja) - It has a regenerative effect on the cutaneous tissues, therefore enhances local circulation in the area treated to bring about revitalization of the dermis.

NOTES

KILO' - Incubation Concentrate

Natural Treatments: New KILO' treatment (product code S2-CK101)

DESCRIPTION

Special concentrate lotion with glycolic acid. It boosts the slimming, firming, antioxidant and deep moisturizing efficacy of Cellend treatment.

Available in ampoules of 30 ml.

MAIN ACTIVE AGENTS

Glycolic Acid - It allows the outer skin, namely the horny coat, to "dissolve" revealing the underlying skin, favouring the absorption of the other active agents. If absorbed in a deeper layer it can stimulate collagen and elastin production.

Glycerin - It helps maintain the water balance in the intercellular matrix. It is used as a skin-conditioning agent and skin protectant.

USE DIRECTIONS

Professional use.

SKIN CONDITION

All skin types.

NOTES

KILO' Catalytic Lotion

Natural Treatments: New KILO' treatment (product code S3-CK101)

DESCRIPTION

Specific body lotion. Active agents, as Faex, help the process of cellulite reduction, while Ivy extract and caffeine improve blood circulation with a lipolytic and toning effect, favouring the effectiveness of the treatment.

Available in ampoule of 30 ml.

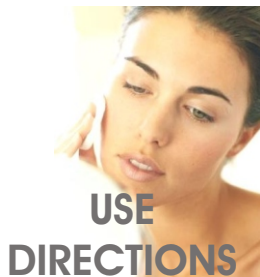

MAIN ACTIVE AGENTS

Caffeine - It presents a lipolytic effect. It also improves blood circulation.
Glycolic Acid - It allows the outer skin, namely the horny coat, to "dissolve" revealing the underlying skin, favouring the absorption of the other active agents. If absorbed in a deeper layer it can stimulate collagen and elastin production.

Ivy Extract (Hedera Helix) - It helps to boost blood circulation, tones and tightens the skin, while helping to remove waste products and fatty build-ups.

Faex (Saccharomices Lysate Extract) - It has stimulating and activating effect on cell metabolism.

NOTES

CELLEND Glaucine Extract

Natural Treatments: New CELLEND treatment (product code S4-CK101)

DESCRIPTION

Professional body lotion enriched with Glaucine which is responsible for decreasing fat deposits and water retention. The mixture of active agents makes the skin firm, elastic and silky.

This product is available inside the professional kit in tube of 50 ml.

MAIN ACTIVE AGENTS

Glaucine - Obtained from Yellow Corn Poppy (*Glaucium flavum*) extract. It has slimming benefits, prevents fat deposits from developing, supporting the formation of collagen.

Soybean Oil (Glicine Soja) - This oil has a regenerative effect on the cutaneous tissues and therefore enhances local circulation, beside it smoothes the skin.

Sea Latuce Extract (Ulva Lactuca Extract) - This green seaweed extract helps to prevent the collagen and elastin from degrading. Improves the elasticity and suppleness of skin.

Rosemary Leaf Oil (Rosmarinus Officinalis) - It helps strengthen the capillaries and has a rejuvenating effect. It is also beneficial for firming and toning skin.

USE DIRECTIONS

Professional use.

NOTES

New KILO' Kit - Enriched with *Glaucine*

Natural Treatments: KILO' treatment (product code K100)

The Kit includes a combination of professional products for performing 10 intensive treatments in cabin:

- Active Cream**, S1-K100, 1 tub of 200 ml
- Modelling Fluid**, S1-CK101, 1 tub of 200ml
- Incubation Concentrate**, S2-CK101, 1 vial of 30 ml
- Catalytic Lotion**, S3-CK101, 1 vial of 30 ml
- Glaucine Extract**, S4-CK101, 1 tube of 50 ml

And a home care product: Kilo' **Plus**, V104, 1 tube of 200ml

METHOD OF USE:

After an accurate scrub with **SPECIAL SCRUB**, cleanse the area to be treated with **CLEANSING CREAM** (concentrate detergent). Remove all the residuals of the products with a wet sponge.

PHASE 1:

Pour in a bowl:

- o 20 ml of **Active Cream**
- o 3 ml of **Incubation Concentrate**
- o 3 ml of **Catalytic Lotion**
- o 5 ml of **Glaucine Extract**

In case of limp tissue, especially in the internal thighs, we suggest to add 2 ml of **BioComplex Firm-lotion**. Mix until obtaining a compact emulsion. Distribute all the compound from ankles to hips, in a fully uniform way.

Wrap the body with a previously damped bandage of elastic cotton (you can use both cold and warm water). Keeping the bandage in a good tension, wrap starting from the ankles till the hips. Cover the body with a blanket and let the cocktail work for 20/30 minutes. Keep the knees higher than the body. If there's a ionophoresis available, set the facility with **NEGATIVE** polarity, for 15/20 MINUTES.

Take the tubular elastic net bandage off, and in case of residual product on the treated area, massage till complete absorption.

PHASE 2:

Apply 25 ml of **Modelling Fluid** and massage until it will be completely absorbed.
