

DERMAFILL Scrub

Natural Treatments: Dermafill Kit

DESCRIPTION

Intensive esfoliating emulsion with micro-spheres of natural quartz. It contains high concentration of moisturizing and nourishing active agents with fast absorption.

Available in cabin size (S1-C200, 200ml) inside the DERMAFILLKIT treatment.

MAIN ACTIVE AGENTS

Glycine Soja Oil: is a species of legume native to East Asia. The plant is classed as an oilseed rather than a pulse. It is an annual plant that has been used in China for 5,000 years as a food and a component of drugs. Soy contains significant amounts of all the essential amino acids for humans, and so is a good source of protein. For this reason it has an anti-oxidant effect.

USE DIRECTIONS

Read carefully the technical treatment card.

SKIN CONDITION

For all skin types for face and body use.

NOTES

It is suggested to use it, during and professional Dermafill treatment.

DERMAFILL Extract

Natural Treatments: Dermafill Kit

DESCRIPTION

Face & body nourishing concentrate with a high concentration of natural active agents with deep moisturizing effect. It is a bi-phasic formula ready for use.

Available in cabin size of 60 ml.

MAIN ACTIVE AGENTS

FUCOMPLEX Extract: Natural active agent from FUCOSE. It is a polisaccharide with a multifunctional effect: It helps to stimulate the hydrolipic film, it improves the long lasting deep moisturizing and nourishing action;

Rosa Moschata Seed Oil: is a species of rose long in cultivation. Its wild origins are unknown but are suspected to lie in the eastern Himalayas. It has an anti-oxydant effect;

Bitteser Orange extract: refers to a citrus tree (***Citrus aurantium***) and its fruit. Many varieties of bitter oranges are used for their essential oil. It helps to stimulate the micro blood circulation reducting also fats into the blood.

Japanese Honeysuckle: is a species of honeysuckle native to eastern Asia including Japan, Korea, northern and eastern China, and Taiwan, which is a major invasive species in North America. It is a twining vine able to climb up to 10 m high or more in trees, with opposite, simple oval leaves 3–8 cm long and 2–3 cm broad. The flowers are double-tongued, opening white and fading to yellow, and sweetly scented. The fruit is a globose dark blue berry 5–8 mm diameter containing numerous seeds. It has antibacterial and anti-inflammatory properti
