

BIOSTEM Cream

Natural Treatments: BIOSTEM treatment (product code V181)

DESCRIPTION

An exceptionally rich cream that melts immediately onto the skin, giving a sensation of deep moisturisation and great softness. Specially formulated to delay the onset of cutaneous ageing, it visibly reduces the effects of time, improving skin density and minimising wrinkles. Suitable for dehydrated and atonic skin and particularly undernourished skin.

It is available in retail size (V181, 50 ml) and as mini tubes (V181/C, 6 ml) inside the BioStem kit.

MAIN ACTIVE AGENTS

Malus Domestica Stem Cells: They preserve the skin stem cells and they reduce the ageing process of the skin.

Hibiscus Extract: It improves the 5 growth factors into the skin.

Ceramides: Useful for the skin defence

Jaluronic Acid: It maintains a high level of deep moisture

Jojoba Oil: It preserves the skin against the external factors

Squalane: It improves the skin texture

Vitamine E: It has an anti-oxidant effect

Vitamine A: It is a radical scavenger

Polisaccharides: They improve the micro blood circulation.

USE DIRECTIONS

Apply the cream on cleansed face, neck and décolleté. Spread it and gently massage it until complete absorption.

In cabin it has to be used for finishing the intensive treatment.
