

Glycol Mask 10%

Product Line: Glycol Masks Professional (code C901)

DESCRIPTION

Soft emulsion for the care of mature tissue, excellent for eyes care and for maintaining, at home, the benefits of salon glycolic treatment, performing a light level peel. Includes in its formulation 10% of a non-buffered, high quality and totally natural glycolic acid, extracted from sugarcane. After few application, skin results suppler and healthier, texture becomes smoother and the appearence of fine lines will be reduced.

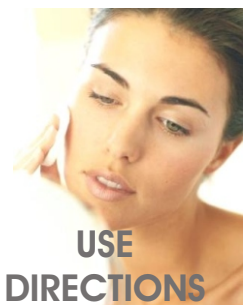

This product is available only in size of 50 ml.

MAIN ACTIVE AGENTS

Glycolic Acid - Glycolic Acid (hydroxyacetic acid) is the first member of the series of alpha-hydroxy carboxylic acids, which means it is one of the smallest organic molecules with both acid and alcohol functionality. It occurs naturally as a trace component in sugarcane -which is the source of our glycolic acid-, beets, grapes and some other kind of fruits. It has an excellent capability to penetrate skin. Once applied, glycolic acid reacts with the upper layer of the epidermis, weakening the binding properties of the lipids that hold the dead skin cells together. This allows the outer skin, namely the horny coat, to "dissolve" revealing the underlying skin. If absorbed in a deeper layer it can stimulate collagen and elastin production.

pH: 2,1/2,2

USE DIRECTIONS

After cleansing apply the product and leave to act for 5 minutes. Remove any residual of cream rinsing carefully with cold water.

SKIN CONDITION

For all skin types. Mature skin (35+ years old)

NOTES

Glycol Mask 40%

Product Line: Glycol Masks Professional (code C904)

DESCRIPTION

Soft gel based on 40% of a non-buffered, high quality and totally natural glycolic acid, extracted from sugarcane. Excellent for professional peeling. Dead cell will be removed and skin gains a fresher and healthier look. It can affect the deeper layers of the skin, helps collagen and elastin regenerate making fine lines less patent, and skin suppler. It is perfect as skin preparation before specific intensive treatments.

This product is available only in cabin size of 250 ml.

MAIN ACTIVE AGENTS

Glycolic Acid - Glycolic Acid (hydroxyacetic acid) is the first member of the series of alpha-hydroxy carboxylic acids, which means it is one of the smallest organic molecules with both acid and alcohol functionality. It occurs naturally as a trace component in sugarcane -which is the source of our glycolic acid-, beets, grapes and some other kind of fruits. It has an excellent capability to penetrate skin. Once applied, glycolic acid reacts with the upper layer of the epidermis, weakening the binding properties of the lipids that hold the dead skin cells together. This allows the outer skin, namely the horny coat, to "dissolve" revealing the underlying skin. If absorbed in a deeper layer it can stimulate collagen and elastin production.

pH: 2,1/2,2

USE DIRECTIONS

For professional use.

After cleansing apply the product with a brush, avoiding eyes contour, and allow it to work for 3/5 minutes. Remove any residual of the product with a clean sponge soaked in cold water and rinse carefully with plenty cold water.

SKIN CONDITION

All skin types.

NOTES

Professional use. It can be used also on all body (legs, arms, breast etc.)

**The product is very active, so there can be possible redness, slight itching feeling. Those effect will immediately disapeare after rinsing with cold water.

Glycol Mask Protect Cream

Product Line: Glycol Masks Professional (code C905)

DESCRIPTION

Thick-bodied protective cream formulated to provide an invisible, uniform and effective protecting film barrier between the skin and harmful environmental factors. It has also moisturizing and soothing action for delicate skin thanks to its precious active agents such as zinc oxide and rice bran oil.

This product is available only in size of 50 ml.

MAIN ACTIVE AGENTS

Zinc Oxide - Zinc reduces itch and inflammation and also has the ability to decrease the impact of topical toxins or irritants. It is a whitening agent and it is also found within sunscreens because of its impressive capability to block UV light. It has also a soothing and calming effect.

Rice Bran Oil (*Oryza Sativa*) - With its natural antioxidants and phytosterols is a very potent skin protectant. It is very rich in Vitamins B and natural minerals so it has excellent ability to protect the skin against premature aging, dehydration and oxidation, and maintaining Ph balance is exemplary.

Soybean Oil - This oil has a regenerative effect on the cutaneous tissues due to the presence of unsaturated fatty acids, and therefore enhances local circulation in the area treated to bring about revitalization of the dermis.

pH: 6,5/7,0

USE DIRECTIONS

Apply a small amount of cream on face and massage with gentle circular movements until complete absorption.

SKIN CONDITION

All skin types, especially delicate ones needing protection.

NOTES

At home it can be used for protecting the skin after a professional glycolic treatment, or from harmful environmental factors (as very low temperature or direct sun rays).

In cabin it can be used for protecting the mucous membrane of lips and nose during the professional application of Glycol Mask 40%.
